

ABSTRACT:

An arrangement (100) for distributing content (200), comprising an aggregator (101) arranged for bundling the content (200) according to a segment profile (209) and distributing the content (200) to a receiving device (120), the receiving device (120) comprising user profile maintenance means (210) for maintaining a user profile (211), and profile transmitting means (212) for transmitting the user profile (211) to a profiling center (220), the profiling center (220) being arranged for aggregating user profiles (211) received from plural receiving devices (120) into an aggregated profile (221), and for making the aggregated profile (221) available to the aggregator (101) for use as the segment profile (209). Also a method of profiling consumer behavior.
